

FLOWER FAIRY

Miami floral installations & brand activations · myflowerfairy.com

FOR IMMEDIATE RELEASE

A five-generation Miami flower family builds the city's largest florals — and now lets clients see them before they exist

Flower Fairy designs, fabricates and installs ceiling florals, flower walls and stage sets from its own Kendall workshop, and opens the studio for hands-on floral workshops in Miami.

MIAMI, FL — Flower Fairy, a family-run floral studio five generations deep, builds large-scale floral installations for Miami restaurants, hotels, concert productions and brand teams out of its own workshop at 12355 SW 129th Ct #9, Miami, FL 33186.

Unlike most large-format floral work in South Florida, Flower Fairy owns every step: design, fabrication, hardware and the install crew. Nothing is sub-contracted, so the installation that goes up is the one that was designed — and the studio can hold to load-in windows set by stadiums, convention centres and dining rooms that never close for more than a night.

What the studio builds

Suspended and ceiling florals. Flower walls and step-and-repeats. Entry arches. Stage and set florals for concerts and festivals. Table and interior programs refreshed on a schedule. Preserved, long-life builds for lobbies and permanent installations. Projects run from \$2,500 to full-venue builds across Miami-Dade, Broward and Palm Beach, and nationally with the studio's own crew.

See it before we build it

Clients upload a photo — or a phone walkthrough video — of the ceiling, wall or room they want transformed, describe the vision, and Flower Fairy's studio tool renders the installation into their own space, frame by frame. The result becomes a shareable design study the client and the studio review together before a single stem is ordered. It removes the oldest problem in event floral: buying something you cannot picture.

Workshops in Kendall

The Kendall workshop opens to the public for small-group floral workshops — installation technique, mechanics and hand-building, taught by the family that does it professionally. Seats are limited and booked online at myflowerfairy.com/booking, where the live schedule and remaining seats are published.

Selected work

Via Emilia (restaurant ceiling installation, Miami) · T-Mobile Miami 5G brand activation (Wynwood) · We Belong Here festival installation (South Florida) · Formula 1 Miami · Chotto Matte · Miami art week booth installations.

Boilerplate

Flower Fairy has been a Miami florist family for five generations. Today the studio designs and fabricates large-scale floral installations and brand activations from its own workshop in Kendall — suspended and ceiling florals, flower walls and step-and-repeats, entry arches, stage and set florals, table and interior programs, and preserved long-life builds. Because Flower Fairy owns its fabrication, hardware and install crew, the installation that goes up is the one that was designed.
